Lifting the lid on one
of the world's
most powerful
controversies

VOICE OF THE VOLCANO

WOW! LOOK AT THIS PICTURE OF THE GRAND CANYON!

IT'S INCREDIBLE! WELL OVER A KILOMETRE DEEP!

HEY, LOOK AT ALL THOSE LAYERS OF ROCK, PILED ONE ON TOP OF THE OTHER ... THE COLORADO RIVER TOOK MILLIONS OF YEARS TO CUT THROUGH THEM. HOW COULD THE BIBLE BE RIGHT WHEN IT IMPLIES THE WORLD IS ONLY SIX THOUSAND YEARS OLD? IT DOESN'T MAKE SENSE.

HOW DO YOU KNOW THAT FOR SURE, SINCE YOU WEREN'T THERE TO SEE IT HAPPEN? SCIENCE IS SUPPOSED TO BE ABOUT MEASURING AND RECORDING THINGS THAT HAPPEN. MANY BELIEVE THAT THE GRAND CANYON WAS FORMED BY A LITTLE WATER OVER A LONG TIME. HOWEVER, HOW DO YOU KNOW THAT IT WASN'T FORMED BY A LOT OF WATER OVER A SHORT TIME?

WELL, I GUESS I DON'T KNOW FOR SURE, BUT IF WE LOOK HOW SLOWLY RIVERS ERODE THEIR COURSES THROUGH THE GROUND TODAY, THAT GIVES US AN IDEA. ALL THESE THINGS TAKE MILLIONS OF YEARS.

NOT NECESSARILY! IN 1980 A VOLCANO NAMED MOUNT ST HELENS EXPLODED IN THE USA'S WASHINGTON STATE. THE INITIAL BLAST WAS AS BIG AS 2,000 HIROSHIMA-SIZED ATOMIC BOMBS.

HOW IT LOOKS NOW
